Subject Index

Activity levels, childhood, cultural and familial influences on, 86
Activity questionnaires, 298
Adolescence, physiological developmental factors in, 220
Adolescent concerns, 151
Adolescents, female, 76, 201
Aerobic capacity, estimated, 186
Aerobic exercise, 122
African-American girls, 275
Age, stability with, 28
American Indian
  cardiovascular curriculum for, 265
  primary prevention of obesity in, 167
Amniotic fluid insulin, 39
Atherosclerosis prevention center program, 222

Behavior modification, 182, 215
Behavioral treatments, 237
Binge-eating disorder, 200
Bioelectric impedance, measurement of human body composition and, 10
Birthweight, 85
Blood pressure, high, 96
Body composition, 115
Body density, measurement of, 12
Body mass index, 38
Body weight (*see* Ideal body weight)
Bronchospasm, exercise-induced, 122

Caloric intake, 73
Caltrac accelerometer, 118
Cardiac dysfunction, 52
Cardiovascular curriculum, 265
Cardiovascular disease, 292
Cardiovascular risk, 93, 220
Causes of obesity, 209
Child compliance, 139
Childrearing, use of foods in, 150
Children, energy intake, 250
Children's knowledge, 141
Cholesterol, 210
Chronic diseases associated with obesity, 168
Clustering of cardiovascular risk factors, impact of obesity on, 99
Community intervention demonstration programs, 267
Comprehensive school health education, 162
Cultural influences on childhood eating patterns and activity levels, 86

Demographic variables, 245
Depression
  risk for, 301
  self-esteem and, 289
Diabetes, 37
Diagnosis of obesity, 207
Dietary patterns, 70
Dietary prescription, 213
Dietary questionnaires, 298
Dietary recommendations, 234
Dieting and binge eating, 203
Disinhibition subscale, 202
Drug use, 244
Dual energy X-ray absorptiometry, 116

Eating behavior, influences on, 57
Eating patterns, childhood, cultural and familial influences on, 86
Education, health, and media campaigns, 110
Electrical conductivity, total body, measurement of, 9
Energy expenditure, 77, 115
Energy intake, 116
  American children's, 250
  energy expenditure and, 18
Entertainment, subtle messages about food products in, 110
Ethnic differences, 85
Ethnic minority youth, target marketing of food products to, 107
Ethnicity and obesity development, 81
Exercise prescription, 122, 214

Familial influences on childhood eating patterns and activity levels, 86
Family role of, in obesity prevention and treatment, 147
Family-based professional treatment services, 268
Family history, 209
Fat intake, 116
Fear of obesity, 230
Fetal hyperinsulinism, 39
Fetus, 36
Five-year outcomes, 238
Future research on influences on eating behavior, 65

Genes, necessary versus susceptibility, 28
Genetic aspects of obesity, 26
Gestational diabetes mellitus, 37

Goals, long-term, 280
Gormally Binge-Eating Scale, 202
Growth and development, 280

Health implications in ethnic minority groups, 87
Health implications of obesity, 3
Health professionals, attitudes of, against being obese, 149
Heart rate, 118
Heritability, 29
High-risk interventions, 155
History of obesity, early natural, 93
Hyperinsulinemia, 271
Hypertension, prevalence of, 46

Ideal body weight, 182
Immune function, altered, 253
In-service training, 273
  teachers', 131
Infant feeding, 86
Inpatient treatment, 257
Insulin, 36
Insulin resistance, sodium retention and, 51
Insulin-like growth factor-1, 186
Internalization, 141

Long-term inpatient treatment, 257

Management of cardiovascular risk in adolescent obesity, 220
Media
  food and nutrition messages in, 295
  role and influence of, 109
Media influence
  childhood obesity and, 104
  eating behavior and, 62
Methodological considerations, 6
Methodological issues, 237
Mexican-American children, primary prevention of obesity in, 137
Mexican-American preschool children, 287
Moderate progressive exercise, 182
Molecular markers, 32
Morbidity, 210
Morbidly obese adolescents, 257
Morbidly obese pediatric population, 253
Multidisciplinary approach, 292

National Health and Nutrition Examination Survey II, 168
Navajo Indians, 169
Nourishment, 281
Nutrition
  films containing messages about, 295
  suboptimal, 233
Nutrition education, 140
Nutrition intervention, 222
Nutritional dwarfing, 231

Obesity
  American Indian children and, 167
  cardiovascular risk and, 93, 220
  causes of, 209
  chronic diseases associated with, 168
  clustering of cardiovascular risk factors and, 99
  depression and, 289, 301
  diagnosis of, 207
  early natural history of, 93
  eating behavior and, 57
  energy expenditure and, 18
  ethnicity and, 81
  family involvement in prevention and treatment of, 147
  fear of, 230
  fetal hyperinsulinism and, 36
  genetic aspects of, 26
  health implications of, 3
  hemodynamic and cardiac consequences of, 46
  increased incidence of, 137
  media influence on, 104
  methodological considerations in assessment of, 6
  parental, 168
  pediatric, 181
  phenotypes of, 26
  physical activity and, 151
  physical training and, 120
  physician's perceptions of, 269
  preschool children and, 287
  prevalence of, 94, 278
  prevention of (*see* Prevention of obesity)
  school-based interventions and, 154
  self-esteem and, 289
  television and, 151
  tracking of, 95
  treatment of, 212
Overfeeding, response to, 32
Overweight, national examination of, 1

Parental/adult care provider influences on eating behavior, 57
Parental obesity, 168
Parental strategies, 141
Peer relationships, 151
Phenotypes, obesity, 26
Physical activity, 115
  free-living, 276
  obesity and, 151, 211
  physical education classes and, 134
Physical education, effects of, on adiposity in children, 127

Physical education curriculum, 130
Physical training, 120
Physician's perceptions of obesity, 269
Population guideline, 75
Potassium, total body, measurement of, 7
Predictive equations, measurement of human body composition and, 13
Prenatal period, 150
Preschool children, factors associated with obesity in, 287
Preschool food choices, 150
Prevalence of obesity, 94
Prevention of obesity, 4
  American Indian children and, 167
  clustering of cardiovascular risk factors and, 99
  goals of, 149
  Mexican-American children and, 137
  school-based interventions and, 154
Primary and secondary prevention, 154
Product placement, 111
Protein-sparing modified fast, 182, 184
Proton absorptiometry, measurement of total body bone mineral and, 11
Psychiatric problems, assessment of, 244
Pueblo Indians, 169

Questionnaires, dietary and activity, 298

Rate of gain, 280, 284
Resting energy expenditure, 117, 186
Rural communities, 267

School functioning, 151
School lunch, 267
School-based interventions, 154
School-wide interventions, 158
Secular trends, prevalence of overweight and, 2
Self-esteem, depression and, 289
Self-management curriculum, 130
Self-perceptions of body weight, 173
Serum lipids and lipoprotein levels, 98
Skinfold thicknesses, prediction of body fat from sum of, 9
Skinfolds, 129
Social cognitive theory, 140
Social developmental factors, 221
Social/environmental influences on eating behavior, 61
Sodium sensitivity to blood pressure, 48
Stability with age, 28
Strength training, 122
Symmetry index, 40

Target marketing, ethnic, 108
Television and obesity, 151
Television watching, 71
Ten-year outcomes, 238
Tobacco use, 244
Tracking of obesity, 95
Treatment, 212
  early frequent
    effectiveness of, 262
    prevention of childhood obesity and, 260
Tumor necrosis factor, 254

U.S. children, dietary patterns of, 72

Waist/hip ratio, 272
Water
  doubly labeled, 19, 119
  total body, measurement of, 6
Weight management evaluation, 281
Willett Food Frequency Questionnaire, 245
